# Preface

It was our privilege to serve as the program chairs for CAV 2022, the 34th International Conference on Computer-Aided Verification. CAV 2022 was held during August 7–10, 2022. CAV-affiliated workshops were held on July 31 to August 1 and August 11 to August 12. This year, CAV was held as part of the Federated Logic Conference (FLoC) and was collocated with many other conferences in software/hardware verification and logic for computer science. Due to the easing of COVID-19 travel restrictions, CAV 2022 and the rest of the FLoC were in-person events.

CAV is an annual conference dedicated to the advancement of the theory and practice of computer-aided formal analysis methods for hardware and software systems. The primary focus of CAV is to extend the frontiers of verification techniques by expanding to new domains such as security, quantum computing, and machine learning. This puts CAV at the cutting edge of formal methods research, and this year’s program is a reflection of this commitment.

CAV 2022 received a high number of submissions (209). We accepted nine tool papers, two case studies, and 40 regular papers, which amounts to an acceptance rate of roughly 24%. The accepted papers cover a wide spectrum of topics, from theoretical results to applications of formal methods. These papers apply or extend formal methods to a wide range of domains such as smart contracts, concurrency, machine learning, probabilistic techniques, and industrially deployed systems. The program featured a keynote talk by Ziyad Hanna (Cadence Design Systems and University of Oxford), a plenary talk by Aarti Gupta (Princeton University), and invited talks by Arie Gurfinkel (University of Waterloo) and Neha Rungta (Amazon Web Services). Furthermore, we continued the tradition of Logic Lounge, a series of discussions on computer science topics targeting a general audience. In addition to all talks at CAV, the attendees got access to talks at other conferences held as part of FLoC.

In addition to the main conference, CAV 2022 hosted the following workshops: Formal Methods for ML-Enabled Autonomous Systems (FoMLAS), On the Not So Unusual Effectiveness of Logic, Formal Methods Education Online, Democratizing Software Verification (DSV), Verification of Probabilistic Programs (VeriProP), Program Equivalence and Relational Reasoning (PERR), Parallel and Distributed Automated Reasoning, Numerical Software Verification (NSV-XV), Formal Reasoning in Distributed Algorithms (FRIDA), Formal Methods for Blockchains (FMBC), Synthesis (Synt), and Workshop on Open Problems in Learning and Verification of Neural Networks (WOLVERINE).

Organizing a flagship conference like CAV requires a great deal of effort from the community. The Program Committee (PC) for CAV 2022 consisted of 86 members – a committee of this size ensures that each member has a reasonable number of papers to review in the allotted time. In all, the committee members wrote over 800 reviews while investing significant effort to maintain and ensure the high quality of the conference program. We are grateful to the CAV 2022 PC for their outstanding efforts in evaluating the submissions and making sure that each paper got a fair chance. Like recent years in

CAV, we made the artifact evaluation mandatory for tool paper submissions and optional but encouraged for the rest of the accepted papers. The Artifact Evaluation Committee consisted of 79 reviewers who put in significant effort to evaluate each artifact. The goal of this process was to provide constructive feedback to tool developers and help make the research published in CAV more reproducible. The Artifact Evaluation Committee was generally quite impressed by the quality of the artifacts. Among the accepted regular papers, 77% of the authors submitted an artifact, and 58% of these artifacts passed the evaluation. We are very grateful to the Artifact Evaluation Committee for their hard work and dedication in evaluating the submitted artifacts.

CAV 2022 would not have been possible without the tremendous help we received from several individuals, and we would like to thank everyone who helped make CAV 2022 a success. First, we would like to thank Maria A Schett and Daniel Dietsch for chairing the Artifact Evaluation Committee and Hari Govind V K for putting together the proceedings. We also thank Grigory Fedyukovich for chairing the workshop organization and Shachar Itzhaky for managing publicity. We would like to thank the FLoC organizing committee for organizing the Logic Lounge, Mentoring workshop, and arranging student volunteers. We also thank Hana Chockler for handling sponsorship for all conferences in FLoC. We would also like to thank FLoC chair Alexandra Silva and co-chairs Orna Grumberg and Eran Yahav for the support provided. Last but not least, we would like to thank members of the CAV Steering Committee (Aarti Gupta, Daniel Kroening, Kenneth McMillan, and Orna Grumberg) for helping us with several important aspects of organizing CAV 2022.

We hope that you will find the proceedings of CAV 2022 scientifically interesting and thought-provoking!

June 2022

# Organization

## Steering Committee

Aarti Gupta	Princeton University, USA
Daniel Kroening	Amazon, USA
Kenneth McMillan	University of Texas at Austin, USA
Orna Grumberg	Technion, Israel

## Conference Co-chairs

Sharon Shoham	Tel Aviv University, Israel
Yakir Vizel	Technion, Israel

## Artifact Evaluation Co-chairs

Maria A. Schett	University College London, UK
Daniel Dietsch	University of Freiburg, Germany

## Publicity Chair

Shachar Itzhaky	Technion, Israel
-----------------	------------------

## Workshop Chair

Grigory Fedyukovich	Florida State University, USA
---------------------	-------------------------------

## Proceedings and Talks Chair

Hari Govind V. K.	University of Waterloo, Canada
-------------------	--------------------------------

## Program Committee

Aina Niemetz	Stanford, USA
Alastair Donaldson	Imperial College London, UK
Alessandro Cimatti	FBK, Italy
Alexander Ivrii	IBM, Israel
Alexander J. Summers	University of British Columbia, Canada
Alexander Nadel	Intel, Israel
Alexandra Silva	Cornell University, USA

Ana Sokolova	University of Salzburg, Austria
Anastasia Mavridou	KBR Inc., NASA Ames Research Center, USA
Andreas Podelski	University of Freiburg, Germany
Andrei Popescu	University of Sheffield, UK
Andrey Rybalchenko	Microsoft Research, UK
Anna Lukina	TU Delft, The Netherlands
Anna Slobodova	Intel, USA
Antoine Miné	Sorbonne Université, France
Armin Biere	University of Freiburg, Germany
Azalea Raad	Imperial College London, UK
Bor-Yuh Evan Chang	University of Colorado Boulder and Amazon, USA
Caterina Urban	INRIA, France
Corina Pasareanu	CMU/NASA Ames Research Center, USA
Dana Drachler Cohen	Technion, Israel
Daniel Kroening	Amazon, USA
David Jansen	Institute of Software, Chinese Academy of Sciences, China
Deepak D'Souza	Indian Institute of Science, India
Dejan Jovanović	Amazon Web Services, USA
Derek Dreyer	MPI-SWS, Germany
Elizabeth Polgreen	University of Edinburgh, UK
Elvira Albert	Complutense University of Madrid, Spain
Erika Abraham	RWTH Aachen University, Germany
Grigory Fedyukovich	Florida State University, USA
Guy Avni	University of Haifa, Israel
Guy Katz	Hebrew University of Jerusalem, Israel
Hadar Frenkel	CISPA, Germany
Hillel Kugler	Bar Ilan University, Israel
Hiroshi Unno	University of Tsukuba, Japan
Isabel Garcia-Contreras	University of Waterloo, Canada
Ivana Cerna	Masaryk University, Czech Republic
Jade Alglave	University College London and Arm, UK
Jean-Baptiste Jeannin	University of Michigan, USA
Joost-Pieter Katoen	RWTH Aachen University, Germany
Josh Berdine	Meta, UK
Joxan Jaffar	National University of Singapore, Singapore
Kenneth L. McMillan	University of Texas at Austin, USA
Klaus V. Gleissenthall	Vrije Universiteit Amsterdam, The Netherlands
Konstantin Korovin	University of Manchester, UK
Krishna Shankaranarayanan	IIT Bombay, India
Kuldeep Meel	National University of Singapore, Singapore

Laura Titolo	NIA/NASA LaRC, USA
Liana Hadarean	Amazon Web Services, USA
Marieke Huisman	University of Twente, The Netherlands
Marijana Lazić	TU Munich, Germany
Marijn J. H. Heule	CMU, USA
Markus Rabe	Google, USA
Martina Seidl	Johannes Kepler University Linz, Austria
Mingsheng Ying	Chinese Academy of Sciences and Tsinghua University, China
Miriam García Soto	IST Austria, Austria
Natasha Sharygina	University of Lugano, Switzerland
Nikolaj Bjørner	Microsoft Research, USA
Nir Piterman	University of Gothenburg, Sweden
Oded Padon	VMware Research, USA
Parasara Sridhar Duggirala	UNC Chapel Hill, USA
Parosh Aziz Abdulla	Uppsala University, Sweden
Pavithra Prabhakar	Kansas State University, USA
Philippa Gardner	Imperial College London, UK
