

الجمهورية الجزائرية الديمقراطية الشعبية

REPUBLIQUE ALGERIENNE DEMOCRATIQUE ET POPULAIRE

MINISTERE DE LA DEFENSE
NATIONALE

وزارة الدفاع الوطني

ETAT-MAJOR DE L'ARMEE
NATIONALE POPULAIRE

أركان الجيش الوطني
الشعبى

ECOLE MILITAIRE POLYTECHNIQUE
CHAHID ABDERRAHMANE TALEB

المدرسة العسكرية المتعددة التقنيات
الشهيد عبد الرحمن طالب

MEMOIRE DE FIN D'ETUDES

Présenté pour l'obtention du diplôme d'Ingénieur d'Etat

Filière : Génie Informatique

Spécialité : Systèmes

Par : - EOC Mohammed Amine BENFARES

- EOC Ilyas LAHMER

Thème

NAMED DATA NETWORKING WITHIN CHALLENGED
NETWORK ENVIRONMENTS: PERFORMANCES
ANALYSIS AND ENHANCEMENTS

Soutenu le : 07/06/2017 devant le jury composé de :

Président :	Mr DJENOURI Djamel	CERIST
Examineurs :	CNE DJAMAA Badis	EMP
	CNE MORADJANA Yakoub	DCC
Encadreur(s) :	CDT SENOUCI Mustapha Reda	EMP
	CDT BOUACHERINE Abdelkader	EST

Contents

1	Introduction	1
1.1	Scope and Objectives	2
1.2	Problem Statement	2
1.3	Contributions	3
1.4	Manuscript Organization	3
2	Background	5
2.1	Introduction	5
2.2	TCP/IP Architecture	5
2.2.1	Current Solutions	5
2.2.2	Fundamental Limitations Of The Current Internet Architecture	7
2.3	Information Centric Networks	8
2.3.1	Naming	10
2.3.2	Routing	10
2.3.3	Caching	10
2.3.4	Security	11
2.3.5	Major ICN Projects	11
2.3.6	Why Named Data	12
2.4	Named Data Networking	12
2.4.1	NDN Packets	13
2.4.2	NDN Node Model	17
2.4.3	Architectural Principles	19
2.4.4	Naming	21
2.4.5	Mobility	22
2.4.6	Caching	26
2.4.7	Security	27
2.4.8	NDN and TCP/IP Interoperability	31
2.5	Routing and Forwarding in NDN	31
2.5.1	Routing	31
2.5.2	Forwarding	32
2.5.3	Forwarding Process	33
2.5.4	Forwarding Strategies	36
2.6	Conclusion	36

3	Challenged Networks	37
3.1	Introduction	37
3.2	TCP/IP in Challenged Networks	38
3.3	Challenges	38
3.4	Types of challenged networks	40
3.4.1	Mobile Ad hoc Network	40
3.4.2	Delay Tolerant Network	42
3.4.3	Vehicular Network (VN)	43
3.4.4	Wireless Sensor Networks	44
3.5	Conclusion	46
4	NDN forwarding against link failures	47
4.1	Introduction	47
4.2	Network Reliability	47
4.3	Link Failure Model	48
4.4	Simulation	49
4.4.1	Performance Metrics	49
4.4.2	Network Topology	50
4.4.3	Simulation scenarios	51
4.4.4	Results Analysis	53
4.5	Conclusion	55
5	NDN forwarding against nodes mobility	57
5.1	Introduction	57
5.2	Ant colony optimization in a nutshell	58
5.3	Ant forwarding strategy (AntFS)	59
5.3.1	Network and node model	59
5.3.2	Neighbor discovery	60
5.3.3	Maintain path information	60
5.3.4	Interest/Data forwarding process	64
5.4	Simulation and results	66
5.4.1	Simulation Environment	66
5.4.2	Performance Evaluation	67
5.5	Conclusion	68
6	NDN forwarding against intermittent connectivity	71
6.1	Introduction	71
6.2	Disaster Scenario	72
6.3	NDN in Post Disaster Scenario	74
6.3.1	Challenges	75
6.3.2	Enabling push based data dissemination in NDN	75
6.4	Critical Data Forwarding Strategy (CDFS)	75
6.4.1	DataSet Synchronization	76
6.4.2	Naming Rules	77
6.4.3	Publish Process	78
6.4.4	Maintaining The State of Data Set	80

CONTENTS

6.5	Simulation	81
6.6	Conclusion	83
7	Conclusion & Future Work	85
